Art Unit: 1771

1. The 112 claim rejections are maintained.
2. The claim objections and art rejections are withdrawn in view of the present amendment.
3. Since claims 32-34 are cancelled, newly added claims should be renumbered as 35-42.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 24-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The 112 claim rejections are maintained for the following reasons. Since the specification makes it clear that the laminate is stretched in a longitudinal dimension to neck the laminate in a transverse dimension, and a first dimension is defined by the transverse dimension while the perpendicular dimension is defined by the longitudinal dimension, the recitation "stretching said laminate in a first dimension to neck said laminate in a dimension perpendicular to the first dimension" is not fully supported by the present specification.

Double Patenting

Art Unit: 1771

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 35-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,472,045. Although the conflicting claims are not identical, they are not patentably distinct from each other because the structure of the laminate material disclosed in claims 1-20 of the U.S. Patent No. 6,472,045 anticipates all the processing steps except the stretching step. However, it is known in the necked laminate art, the laminate won't be necked in the transverse dimension until action of stretching in the longitudinal dimension is completely done. Accordingly, the laminated is inherently stretched in the longitudinal dimension.
7. There is no obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,610,383 due to the restriction requirements made on 10/18/2001 in the Application No. 09/455,513, filed 12/06/1999, now U.S. Patent No. 6,610,383.

8. The art rejections over Haffner (US 5,514,470) in view of McCormack (US 5,695,868) have been overcome by the present amendment. The combination of the cited references leads to the necked laminate having the striated rugosities formed in the dimension perpendicular to the stretching direction. On the other hand, the claims require the necked laminate having the striated rugosities formed in the stretching direction. Therefore, the art rejections are withdrawn.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
